This is a user manual for an example project.

Introduction

This project does something. We just haven't decided what that is yet.

Source Code

Java code from project

```
public boolean contains(String haystack, String needle) {  
    return haystack.contains(needle);  
}
```

This page was built by the following command:

```
$ ./gradlew asciidoctor
```

Images

Attributes

Built-in

asciidoctor-version

1.5.5

safe-mode-name

unsafe

docdir

/Users/mateusz/Scripts/asciidoc/owasp-asciidoc/src/docs/asciidoc

docfile

/Users/mateusz/Scripts/asciidoc/owasp-asciidoc/src/docs/asciidoc/example-manual.adoc

imagesdir

./images

Custom

project-version

1.0.0-SNAPSHOT

sourcedir

/Users/mateusz/Scripts/asciidoc/owasp-asciidoc/src/main/java

endpoint-url

<http://example.org>

Includes

include::subdir/_b.adoc[]

content from *src/docs/asciidoc/subdir/_b.adoc*.

include::_c.adoc[]

content from *src/docs/asciidoc/subdir/c.adoc*.

Includes can be tricky!

build.gradle

```

buildscript {
    dependencies {
        classpath 'org.asciidoctor:asciidoctorj-pdf:1.5.0-alpha.15'
    }
}

plugins {
    id 'org.asciidoctor.convert' version '1.5.8.1'
}

apply plugin: 'java'

version = '1.0.0-SNAPSHOT'

asciidoctorj {
    version = '1.5.5'
}

asciidoctor {
    backends 'pdf'
    attributes \
        'build-gradle': file('build.gradle'),
        'sourcedir': project.sourceSets.main.java.srcDirs[0],
        'endpoint-url': 'http://example.org',
