This is a user manual for an example project.

include::subdir/cross\_site\_scripting.adoc

## Introduction

This project does something. We just haven't decided what that is yet.

## Source Code

*Java code from project*

```
public boolean contains(String haystack, String needle) {  
    return haystack.contains(needle);  
}
```

This page was built by the following command:

```
$ ./gradlew asciidoctor
```

## Images

## Attributes

*Built-in*

**asciidoctor-version**

1.5.5

**safe-mode-name**

unsafe

**docdir**

/Users/mateusz/Scripts/asciidoc/owasp-asciidoc/src/docs/asciidoc

**docfile**

/Users/mateusz/Scripts/asciidoc/owasp-asciidoc/src/docs/asciidoc/owasp-parent.adoc

**imagesdir**

./images

*Custom*

**project-version**

1.0.0-SNAPSHOT

**sourcedir**

/Users/mateusz/Scripts/asciidoc/owasp-asciidoc/src/main/java

**endpoint-url**

<http://example.org>

## Includes

*include::subdir/\_b.adoc[]*

content from *src/docs/asciidoc/subdir/\_b.adoc*.

*include::\_c.adoc[]*

content from *src/docs/asciidoc/subdir/c.adoc*.

Includes can be tricky!

## build.gradle

```

buildscript {
    dependencies {
        classpath 'org.asciidoctor:asciidoctorj-pdf:1.5.0-alpha.15'
    }
}

plugins {
    id 'org.asciidoctor.convert' version '1.5.8.1'
}

apply plugin: 'java'

version = '1.0.0-SNAPSHOT'

asciidoctorj {
    version = '1.5.5'
}

asciidoctor {
    backends 'pdf'
    attributes \
        'build-gradle': file('build.gradle'),
        'sourcedir': project.sourceSets.main.java.srcDirs[0],
        'endpoint-url': 'http://example.org',
        'source-highlighter': 'coderay',
        'imagesdir': './images',
        'toc': 'left',
        'icons': 'font',
        'setanchors': '',
        'idprefix': '',
        'idseparator': '-',
        'docinfo1': ''
}

```
